 - EPA Recycling Standards
 - Guiding Principles of Responsible Recyclers R2/RIOS standard
 - ISO 14001
 - OSHAS 18001
 - FACTA – Federal Identity Theft Compliance Mandate
 - No landfills or incinerators initiative

No Cost Solution to our Customers with potential for profit sharing

Major Eco Problem

- Over 20 pounds of E-Waste is generated per person annually
- The EPA estimates only 12.5% of E-Waste is recycled and 87.5% goes to a landfill or incinerator
- E-Waste is highly toxic
- CRT monitors on average contain nearly 8 pounds of lead
- Circuit boards contain carcinogens and heavy metals

United Electronic Recycling – Solving Problems Today

Why are we recycling?

- 23+ states have passed legislation mandating statewide e-waste recycling
- 12 states currently have a landfill or incineration ban on electronic devices
- UER is helping companies to recycle responsibly
